

Important: Trimmer Strap

On leaving the factory all paragliders are equipped with a Trimmer Dummy - when it is present, given paraglider conforms to EN norm. If you would like to have additional possibility of AoA adjustment, you have to replace the dummy strap with complete trimmers.

Be aware though, the paraglider was not certified in any other configuration than "fully closed" position.

All necessary information on standard trimmer use you will find in the manual.

Exchanging the Trimmer Dummy for a Standard Trimmer Strap:
